

CALEB MANTEY

SENIOR FULL-STACK / AI
SOFTWARE ENGINEER

CONTACT

Accra, Ghana

manteycaleb@gmail.com

+233 57 887 6149

CORE SKILLS

Backend & data

Ruby on Rails, Node.js, NestJS,
Python / FastAPI, REST,
WebSockets, PostgreSQL, MySQL,
Redis

Frontend & mobile

TypeScript, React, Next.js, Angular,
Flutter, React Native

AI engineering

LLM APIs (OpenAI, Claude), agents,
multi-agent, RAG, LangChain,
LangGraph, MCP, evals

Delivery

Docker, AWS, DigitalOcean, GitHub
Actions, CI/CD, automated testing,
leadership

EDUCATION

B.Sc., Geomatic Engineering
University of Mines and Technology
(UMaT), Ghana

RECOGNITION

- 2023 NEIP Presidential Pitch, overall winner (Relu Interactives).
- 2023 Ghana Innovation & Startup Awards, Animation/Gaming Startup Innovation of the Year.

LINKS

Portfolio

LinkedIn

YouTube

OPEN SOURCE & TEACHING

Publish engineering tutorials (clean architecture, patterns, Unity tools) on GitHub & YouTube.

PROFILE

Senior full-stack & AI engineer, Co-Founder/CTO of Relu Interactives, and lead engineer of Relu Spatial. I build backend systems, full-stack products, and production AI, from autonomous agents and RAG pipelines to LLM workflows that take action, across immersive tech, industrial operations, health, workforce, and payments. Strongest backend experience in Ruby on Rails, Node.js/NestJS, and Python.

EXPERIENCE

Relu Interactives · Co-Founder & CTO

Sep 2022 – Present

- Lead engineer of Relu Spatial; built the platform across backend services and its real-time 3D/XR engine, supporting AI-assisted creation, a desktop editor, multi-user sessions, and cross-device publishing.
- Built ACTIVA, an operations-intelligence platform for industrial teams with live dashboards, automatic alerts, and a built-in AI assistant.
- Set technical direction and lead engineers and designers from product planning through deployment across platform and client work.

Zenjob · Full-Stack & AI Software Developer

Jul 2024 – May 2025

- Built AI-powered matching and workflow-automation features for a European staffing platform, integrating LLM tooling into product and operational processes.
- Partnered across teams to find automation opportunities and connect new services into existing workflows.

Think-it · Software Engineer

Apr 2023 – Jun 2025

- Built and maintained scalable, AI-integrated applications for mission-driven climate- and health-technology partners, with strong tests, docs, and performance work.

Andela / client projects · Senior Software Engineer

Sep 2021 – Jan 2024

- Delivered full-stack client projects, backend integrations, and browser-based 3D applications for distributed teams.

Encodev Labs / eGotickets · Software Engineer

Sep 2020 – Apr 2023

- Maintained and extended a Ruby on Rails ticketing & payments platform; contributed architecture and mobile engineering to besaCare, a health-access platform.

Stanbic Bank Ghana · Software Developer

Jun 2019 – Oct 2019

- Implemented frontend and backend features for banking applications (Angular, Java/Spring Boot).

SELECTED PROJECTS

Relu Spatial · Lead engineer; backend + engine for a cross-device 3D/WebXR creation platform.

ACTIVA · Industrial operations intelligence with live dashboards, alerts, and a built-in AI assistant.

Dropin · Ride-hailing app for Ghana with rider and driver apps; NestJS, WebSockets, PostgreSQL, Docker, Flutter.

Zenjob AI workflows · LLM-powered matching and operational automation inside a workforce product.

besaCare · Healthcare-access platform (appointments, consultations, records); architecture + mobile.

eGotickets · Ruby on Rails ticketing & payments platform with features, integrations, and deployment.

joy_ussd_engine · Open-source Ruby library for text apps across USSD, WhatsApp, and Telegram.
